DISCUSSION

Where are you with AI today?

Three situations that come up in every organisation. Which one is most familiar to you?

1

The licences have been bought. How many people use them every week?

No training was arranged when the licences were rolled out. The licences can then cost thousands of euros a month without the work changing at all.

2

Have you tried it and found it doesn't really work?

Without practice, results stay weak. Instead of saving time, people get frustrated and the tool falls out of use.

3

Do your staff dare to enter company information into it?

Uncertainty about information security and data use can easily freeze AI use across the whole organisation.

WHY THIS IS DIFFERENT

One training day doesn't change the working day

A listening experience, a viewing experience, a clicking experience. Nothing changes in day-to-day work.

THE USUAL WAY

1. An inspirational talk or a webinar for everyone
2. Licences are handed out and everyone hopes for the best
3. Questions come up a week later, when nobody is there to answer
4. Use fades to a few enthusiasts

AI TASONNOSTO

1. Practice that relates to people's own work, done with their own tools, for two or four weeks
2. Questions answered all year: AI clinics and the tutor
3. Progress towards the goals is tracked and reported

Using AI is a skill. You learn it by doing, not by watching slides. Questions only come up once people really start using it.

AI TASONNOSTO IN A NUTSHELL

The year of the programme

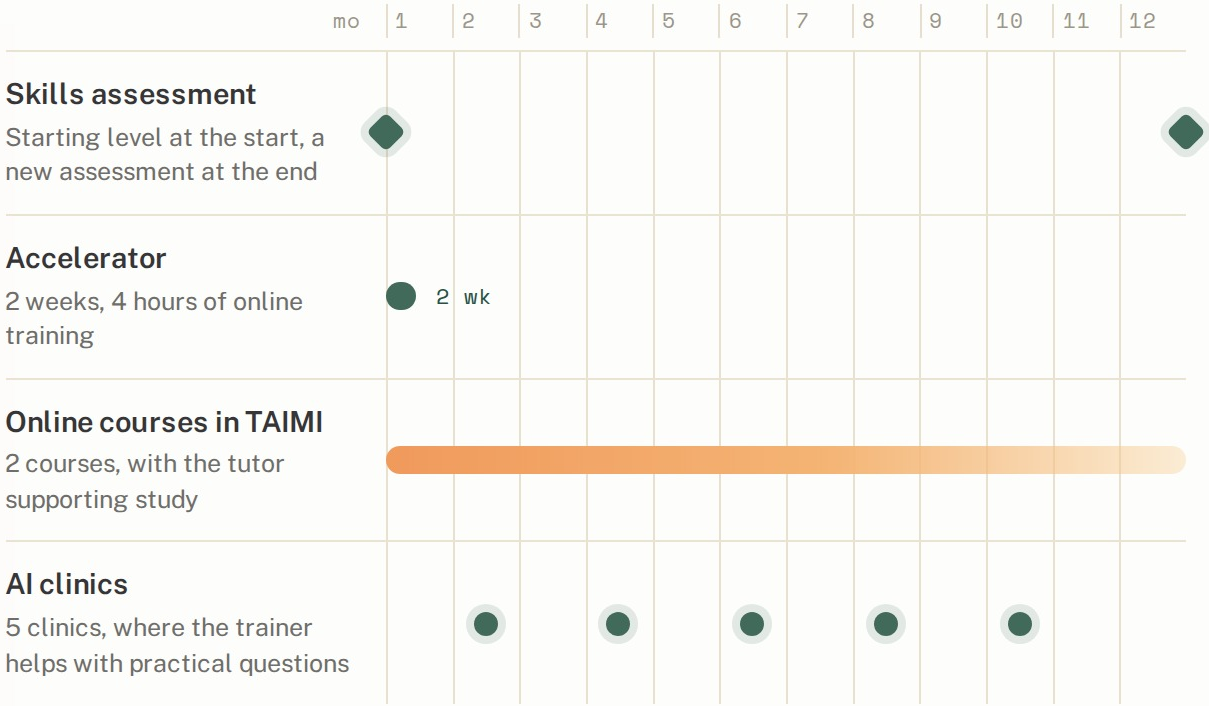

AI Tasonnosto | AI Tasonnosto Pro

€ 8,500 + VAT

Participants	Up to 50
Accelerator	2 weeks
Online training	4 hours
Online courses	2 courses
AI clinics	5 clinics
Access to TAIMI	12 months

Accelerator, courses and clinics

Example timing

WEEK 0

Initial assessment

What participants use, for what and how confidently.

WEEKS 1–2

Accelerator

Online sessions with Santeri, practice that relates to your own work.

MONTHS 1–12

Clinics and TAIMI

Courses and the AI tutor in use, with completions showing in reports.

MONTH 12

Final assessment

Whether the goals were reached and what to do next.

ACCELERATOR

Two weeks, your own work, your own tool

Participants really practise using AI. No made-up examples, just the work that's on their desk right now.

1

Weekly online sessions

Led by Santeri Kallio. 4 hours in total, 8 in the Pro package. The sessions are online, so everyone can take part.

2

With your tool

Microsoft Copilot, Claude or ChatGPT. The sessions are built around whatever you use.

3

Tasks from your own work

Emails, reports, guidelines, spreadsheets. Each participant brings their own task and does it with AI.

4

Practice between sessions

The trainer guides participants into independent practice. Online courses and the AI tutor support them in between.

Four hours of sessions isn't much. Skills grow through practice between them, which is why practice time is booked in calendars for the duration of the accelerator.

THE TAIMI PLATFORM FOR THE WHOLE YEAR

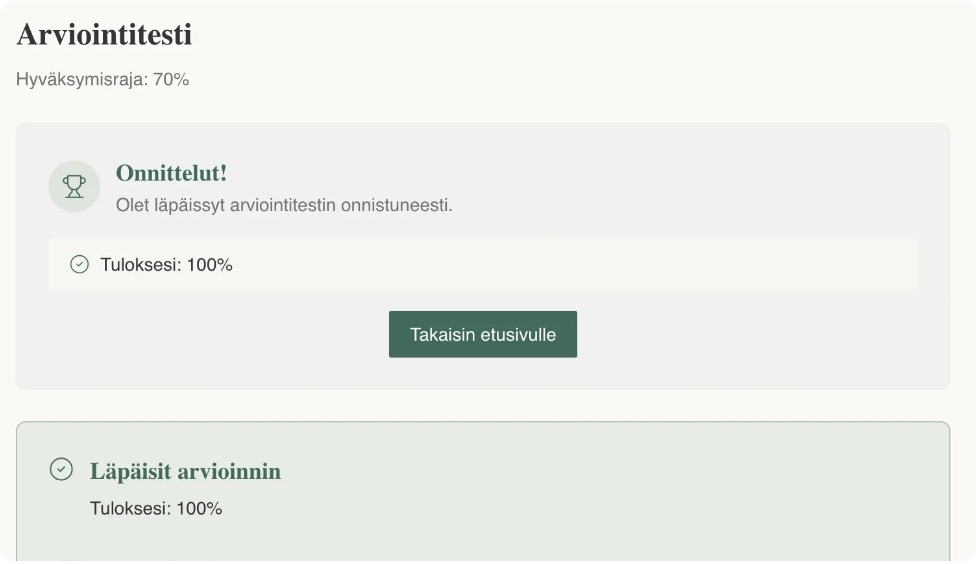

Online courses that verify skills

- **AI basics** — EU AI Act, Article 4
- **How to use Microsoft Copilot**
- **Using and building AI agents** — PRO
- **Using the Cowork AI assistant** — PRO

Courses are completed through conversation. The AI tutor asks, the learner answers in their own words and gets feedback right away. The tutor answers from your organisation's own materials and shows its sources.

EU AI ACT, ARTICLE 4

Employers must support the development of their staff's AI literacy. No specific level is required (amendment 2026/1744, in force from 27 July 2026), but action is. The AI basics course is one such action, and completion is documented.

TAIMI's assessment test: the learner answers in their own words, and AI assesses the answer against the learning objectives.

TWO DIFFERENT THINGS

Your AI application is the tool for work. TAIMI is a learning environment, and its use is included in the programme for 12 months.

INFORMATION SECURITY

Data in the EU. No identifying information is sent to the AI interface. Customer data isn't used to train models. DPA available.

A YEAR OF SUPPORT

AI clinics: help when people start using it

Questions only come up once people start using the tool. The trainer answers them live all year. Attendance is optional, and questions can be sent in advance.

TYPICAL QUESTIONS IN A CLINIC

> Why can't Copilot find the file I just saved?

> Can I enter customer data here or not?

> How do I get a summary of this 40-page report that I can trust?

AI Tasonnosto 5 clinics a year **AI Tasonnosto Pro** 10 clinics a year

FOLLOW-UP

You see whether the goals were reached

Skills are assessed before and after the programme. Progress towards the goals is tracked and reported.

1

Initial assessment

Before the accelerator: what participants use, for what and how confidently. This shows the starting level.

→

2

Follow-up during the programme

Course completions and use of the AI tutor show in TAIMI's reports all year.

→

3

Final assessment and a report to management

Whether the training reached its goals and what to do next.

We run the training on data: the goals are agreed at the start, and progress towards them is tracked throughout the programme.

TRAINER

Your trainer: Santeri Kallio

AI expert, CEO and founder of TAIMI.

1. Worked in Reaktor's Data & AI team on some of Finland's first generative AI development projects.
2. Has trained more than 4,000 Finnish professionals, including at Alma Media and ETLA.
3. Runs every accelerator and clinic himself. No rotating consultants.

IN PRACTICE

What we need from you

Not much. The programme is built so that it doesn't create work for you. No installations or integrations: TAIMI runs in the browser, and login details arrive by email.

YOU

1. Name the participants (up to 50, or 150 in the Pro package) and one contact person.
2. Choose the tool to practise with.
3. Set aside time for participants to attend the sessions and practise during the accelerator.

WE

- Initial and final assessment
- Online sessions and tasks
- Online courses and the AI tutor in TAIMI
- AI clinics for a year
- A report to management
- Support throughout the programme: info@taimi.ai

WHO DECIDES WHAT

IT and information security

Which application is allowed, with which rights, and what kind of material may be used in practice.

HR and L&D

The participant group, the learning goal, and time for the sessions and for practice.

AI lead

One recognisable work task for the group to practise.

Management

The change you're after, a responsible person and a date for reviewing next steps.

FIT

Who this is for

A good fit when

- You have an AI tool or are about to get one, and use has stayed low.
- Your staff do knowledge work: communications, reports, guidelines, data.
- Management wants to know whether the training reached its goals, not just that it took place.

Not a good fit if

- You're looking for one inspirational talk for all staff. You can get those elsewhere.
- You have no AI tool and aren't planning to get one. Practice needs a tool.
- Nobody has time to attend the sessions. In that case, start with one team.

PRICE

Two fixed-price packages

AI Tasonnosto

€8,500 + VAT

- Up to 50 participants
- 2-week accelerator, 4 h of online training
- 2 online courses: the basics and Copilot
- 5 AI clinics
- TAIMI platform for 12 months
- Initial and final assessment

AI Tasonnosto Pro

€15,000 + VAT

- Up to 150 participants
- 4-week accelerator, 8 h of online training
- 4 online courses: plus agents and Cowork
- 10 AI clinics
- TAIMI platform for 12 months
- Initial and final assessment

No set-up or integration fees. Extra days and larger groups are agreed separately. VAT is added to the prices. Price list dated 22 September 2026.

NEXT STEP

How we get started

1

Kick-off meeting

30 minutes: participants, tool and schedule.

2

Initial assessment

Participants answer a short assessment and get their TAIMI logins.

3

Accelerator

Two weeks of sessions and practice that relates to your own work. Four in the Pro package.

4

A year of support

AI clinics, courses and the tutor in use. At the end, the final assessment and a report to management.

Shall we agree on the next step?

A proposal tomorrow and a half-hour kick-off meeting next week.
